

The Customizer

PxPlus 2017 (v14) and PxPlus 2018 (v15)

The Customizer

Agenda

- What is the Customizer?
- Defining Custom Information
- User-Defined Files
- Housekeeping
- Controlling the Customizer

The Customizer

Introduction

- Display custom information dynamically on any NOMADS or *iNomads* panel
- **No existing application changes**

Information is displayed in a Customizer grid added to the bottom of the panel...

File Maintenance for Client Master File

Client ID:

... or in a concurrent panel displayed next to the parent panel

2018

The Customizer

Introduction

- Custom data sources:
 - Application files
 - Formulas
 - User-defined files (modifiable)
- Gear the custom information to specific users or a wider audience
- Uses security classifications to maintain access control
- Full multilingual capabilities

The Customizer

Viewing Custom Information

- Automatic Display
 - Information is displayed whenever the panel is displayed

Info Item	Value
Sales Rep Name	Dora King
Alternate Contact	Hiram Hayes
Alternate Contact Phone	(555) 987-6543
Credit Used	 20%

- When adding custom information dynamically to a panel at run-time, the information is displayed immediately following its definition
 - On fixed size panels, the information is displayed the next time the panel is invoked
- Theme support for Customizer grid

The Customizer

Viewing Custom Information

2018

- Concurrent Panel Display
 - Automatically sized to fit information items
 - Resizable, but not subject to persistence
 - Located at top right of parent panel
 - Synchro-locked to parent
 - Panel always there (cannot be closed)

- NOMADS
 - Set **%NOMADS'Custom_Wdw=1** to turn on the concurrent window display system-wide
- *iNomads*
 - Only supports concurrent display

The Customizer

Viewing Custom Information

- Control *Who Sees What*
 - Customizer definitions can be:
 - **Personal**, for an individual user
 - **Public**, for a general audience
 - Any panel can have multiple custom definitions
 - Personal definitions take precedence
 - Public definitions
 - For general use
 - Content access is subject to Security Classifications based on NOMADS Security classes
 - Set up by a person with ADMIN or CUSTOMIZER Security Classification

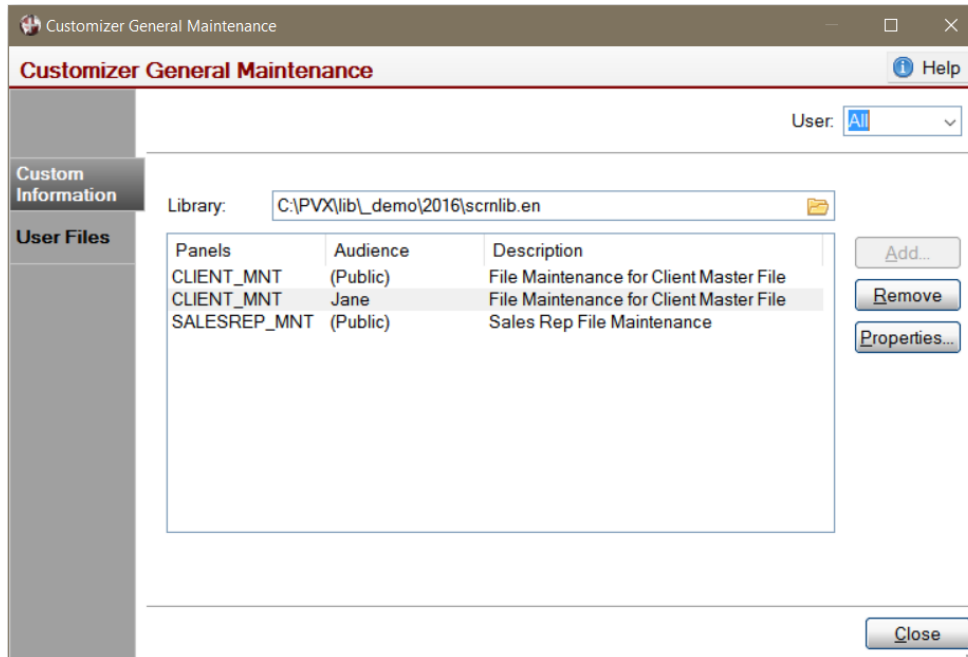

Note: If no NOMADS Security is set up , then the default is **no** restrictions

The Customizer

Defining Custom Information

- Two utilities to create, edit or delete custom information:
 - *Customize Panel*
 - *Customizer General Maintenance*

The Customizer

Defining Custom Information

- *Customizer General Maintenance*
 - Edit custom information on any panel in any library
 - ADMIN or CUSTOMIZER level security classification required
 - Available through the **NOMADS Library Object Selection** interface
 - *Customize Panel* entry in list box popup menu
 - *Customize* button in Button and Toolbar views
 - Available at run-time
 - Generate a 9996 CTL value through a function key, System menu, etc.
 - Available using the **Customize** extended command

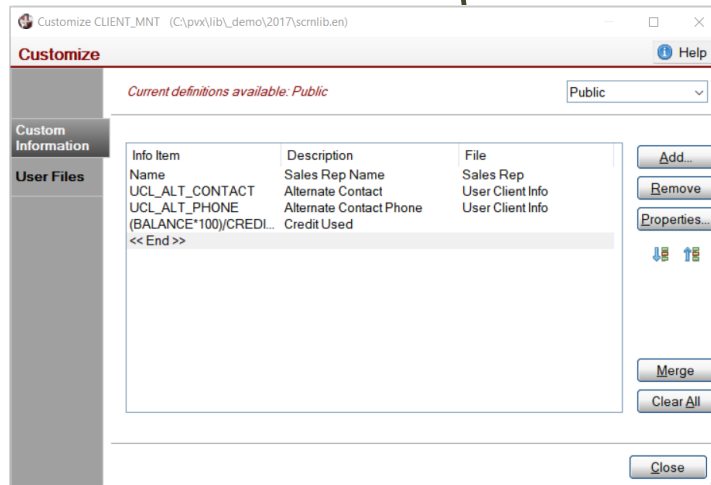

2017

The Customizer

Defining Custom Information

- *Customize Panel (run-time definition)*

- Add custom information to the *current* panel
- Optionally Available at run-time
 - *Customize Panel* entry on panel popup menu
 - Generate a 9999 CTL value through a function key, System menu, etc.
 - Availability can be controlled

2017

The Customizer

Defining Custom Information

- *Customize Panel*
 - *Add, Remove, Edit information items on the current panel*
- *Merge* 
 - Easily share Public and Personal items
 - Copy existing items from other definitions to your custom definition
 - Public items and Personal items marked as shareable
- *Clear* 
 - Removes all information items from the current definition

The Customizer

Creating Custom Information

- Information Sources
 - Application Files
 - Formulas
 - User-Defined Files

File Maintenance for Client Master File (Custom Information)	
Custom Information	Value
Name	Robert (Bob) LeChat
Credit Used	59%
Alternate Contact	David Joseph
Alternate Contact Phone	(123) 456-7890

- Custom information can consist of one or more items from any or all of the information sources

The Customizer

Creating Custom Information

- Application Files
 - Add additional information that is not currently displayed
 - Display only
 - Data Dictionary files only

The Customizer

Creating Custom Information

- Application Files
 - Identify the *File* by Logical File Name
 - Pick the *Information Item* (or field) to display
 - Define a *Record Identifier* (primary key contents) to identify and access the desired record
 - Built from program variables and panel items
 - Numeric values support a *Normal* display, as well as the new *Percent Bar* display

2017

The Customizer

Creating Custom Information

- Formulas
 - Create new information using formulas
 - Numeric calculations
 - Built from digits, numeric functions, file fields and panel information items
 - Text manipulation
 - Concatenate text components comprised of literal values, program variables, file fields and values from panel items
 - Items may be comprised of substrings, padded or stripped values, and/or case conversions
 - Free-form entry of formulas restricted to those with ADMIN or CUSTOMIZER Security Classification

The Customizer

Creating Custom Information

- Defining the Formula

- *Short Description*

- Will appear as the label for the formula results

- Select the *Type* of data to be manipulated

- Numeric/Calculation or Text

- *Maximum Length* of the result

- Determines column width

- Define an optional *Display Format* for formatting the data

- Build the *Formula*

- Numeric formulas support a *Normal* display, as well as the new *Percent Bar* display

The Customizer

Creating Custom Information

- User-Defined Files
 - Files that have been created to hold additional data used by the Customizer
 - Contents defined by the user
 - Data is modifiable

The Customizer

Creating Custom Information

- User-Defined Files
 - Identify the *File*
 - Pick the *Information Item* (or field) to display
 - Define a *Record Identifier* (primary key contents) to identify and access the desired record
 - Built from program variables and panel items
 - Check the *Allow Update* option to allow data to be entered, updated and deleted
 - Contents of User-Defined Files are updated automatically when a user alters the contents of the Custom grid

The Customizer

Creating Custom User-Defined Files

- Files whose content is defined by/for the end user
 - Fields determined by user
 - Public or Personal files
 - Public – Security can be set at file and field levels
 - Accessible to multiple panels
 - Field contents can be modified in the Customizer Grid
 - Define using *Customize Panel* or *Customize General Maintenance* interfaces

The Customizer

Defining a User-Defined File

Item Description	Item Identifier
Alternate Contact	UCL_ALT_CONT...
Alternate Contact Phone	UCL_ALT_PHONE
<< End >>	

- Enter a *Descriptive File Name* to identify the file
- A default *Physical File Name* is generated, but you can enter your own simple file name
 - User-Defined Files placed in **[pxplus exe dir]/custom** directory by default, or you can specify a directory in **%NOMADS'Custom_Dir\$** (recommended)
- Add/Edit/Remove file items

The Customizer

Defining a User-Defined File

- Add/Remove/Edit *File Items*

Define File Item

Item Identifier: UCL_ALT_CONTACT

Description: Alternate Contact

Data Type :

Text

Calculation

Length: 30

Display Format: Define...

Input Type:

- Input Box
- Input Box with Ellipsis...
- Multi_line Input
- Check Box
- Check Mark
- Drop Box
- Hidden Drop Box
- Variable Drop Box

Control Text:

Security Ok Cancel

- Enter an *Item Identifier* (Field name) and a brief *Description*
- Indicate the data *Type*, Text (string) or Calculation (Numeric)
- Specify the maximum data *Length*
- Define a *Display Format* (optional)

The Customizer

Defining a User-Defined File

- Add/Remove/Edit *File Items*

Define File Item

Item Identifier: UCL_ALT_CONTACT

Description: Alternate Contact

Data Type :

Text

Calculation

Length: 30

Display Format: Define...

Input Type:

- Input Box
- Input Box with Ellipsis...
- Multi_line Input
- Check Box
- Check Mark
- Drop Box
- Hidden Drop Box
- Variable Drop Box

Control Text:

Security Ok Cancel

- Choose an *Input Type*
 - Input Box
 - Input with Ellipsis...
 - Multi_Line Input
 - Check Box
 - Check Mark
 - Drop Box
 - Hidden Drop Box
 - Variable Drop Box
- Enter optional text labels for Check Box and Check Mark input types in the *Control Text* box. Also enter Drop Box items here, one item per line
- Public User-Defined Files
 - Click the *Security* button to assign a Security Classification to the File Item

The Customizer

Defining a User-Defined File

- User-Defined File definitions are stored in the User Dictionary File and Elements files
 - ***providex.udf*** and ***providex.ude***
 - Similar in layout to the Data Dictionary File and Elements files (***providex.ddf*** and ***providex.dde***)
- User-Defined Files are standard PxPlus VLR files with *embedded* dictionaries
 - External key – 127 bytes
 - Record size – 4000 bytes

The Customizer

Defining a User-Defined File

- File Keys
 - User-Defined Files have an external key with a key size of 127
 - Embedded Dictionary name is **USER_KEY\$**
 - The specific make-up of the key is not defined at creation
 - Key contents are defined for individual panels when user items are selected for display
- Data Contents
 - From the user entering data into the customizer grid
 - Content can be populated by developer

The Customizer

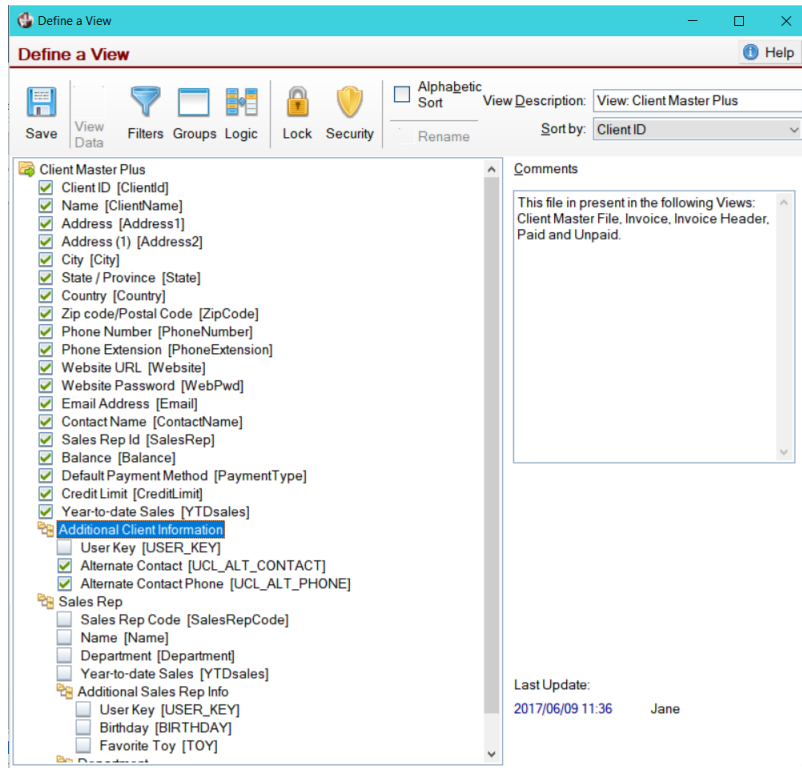

Looking at User-Defined File Data

- Via the Customizer grid
- Files can be read directly
 - User-Defined Files are standard PxPlus VLR files with embedded dictionaries
 - (You would have to code this)

The Customizer

Looking at User-Defined File Data

- Files can be used to define *Data Sources* in the **Views** system using the physical file name
 - Relationships with other data sources can be set up to include the user data
 - Views that include User-Defined Files
 - Are accessible to the PxPlus SQL ODBC driver
 - Can be used to create Report Writer reports

The Customizer

Housekeeping

- *Customizer General Maintenance*
 - *All User* setting allows access to all Public and Private definitions to:
 - Add new custom panel definitions
 - Remove definitions
 - Modify definitions
 - Add User-Defined Files
 - Remove User-Defined Files
 - Edit User-Defined File Definitions
 - View contents of User-Defined Files
 - Change contents of User-Defined Files

The Customizer

Controlling the Customizer

- Who gets to create/modify custom panel definitions?
 - The Developer
 - *Customizer General Maintenance*
 - *Design Mode*
 - NOMADS Library Object Selection
 - **Customize** extended command
 - *At run-time*
 - CTL-9996 generation
 - The Developer and/or End-User
 - *At run-time*
 - *Customize Panel* popup menu on panel
 - CTL-9999 generation for popup
 - CTL-9996 generation for General Maintenance

2017

2017

The Customizer

Controlling the Customizer

2017

- *Customize Panel* popup menu
 - Availability of *Customize Panel* item on the panel popup menu is highly flexible
 - Popup menu item available to everybody
 - Set **%NOMADS'Enable_Customizer_Popup=1**
 - Popup available on a Panel Library basis
 - Create a Customizer Definition file for the library
 - The *Utility* menu on the *Library Object Selection* interface has an option to *Create/Remove Customizer Library*
 - Suppress the entry on the popup menu altogether
 - I.E. the end user *cannot* define custom information
 - Set **%NOMADS'No_Customize=1**
 - Do not set **%NOMADS'Enable_Customizer_Popup** on

The Customizer

2018

Controlling the Customizer

- Excluding Panels from Customization
 - Deny run-time access to the *Custom Definition* for certain users and/or specific panels
 - Supply your own optional callable program to exclude panels from customization:
 - **%NOMADS'Custom_Exclude_Program=prospath\$**
Called program has three arguments:
 - Path of current library (read only)
 - Panel name - upper-case, padded to 12 (read-only)
 - Exclude flag – Numeric, *0=Allow customization, 1=Exclude panel from customization* (write-only)
 - Program is called by NOMADS when panel invoked:
 - **CALL %nomads'Custom_Exclude_Program\$,
ERR=*NEXT,PTH(%SCR_LIB),PAD(UCS(SCRN_ID\$),12),
_exclude**

The Customizer

- A Review of What's New
 - Improved Customizer Integration
 - Popup menus
 - New Percent Bar display option for Application fields and formulas

- New concurrent window display
- *Merge* and *Clear* definition options
- Theme support for Customizer grid
- New CUSTOMIZER security class
- Ability to exclude panels from definition
- Integration into *iNomads*

2017

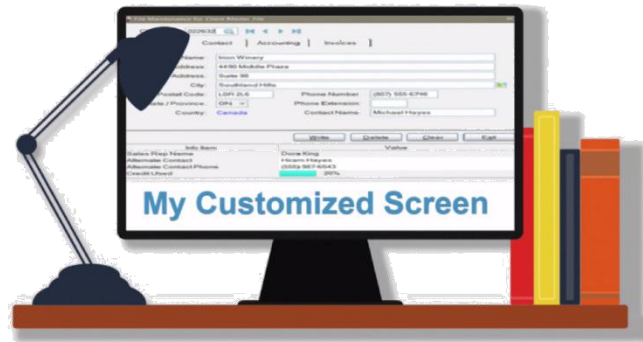

2018

The Customizer

- Included in v18 Professional , eCommerce and Wayfarer bundles
 - Also available as a NOMADS Add-on package #20007
- For more information, see the PxPlus Manual:
[NOMADS Graphical Application > NOMADS Add-Ons > Customizer](#)

An easy way for users
to tailor their screens

Additional Resources

The help link(s) below refer to the current on-line help pages. The functionality may have been further updated since the PxPlus 2018 (version 15) release
