# Product Registration

PxPlus 2017 (v14) & PxPlus 2018 (v15)
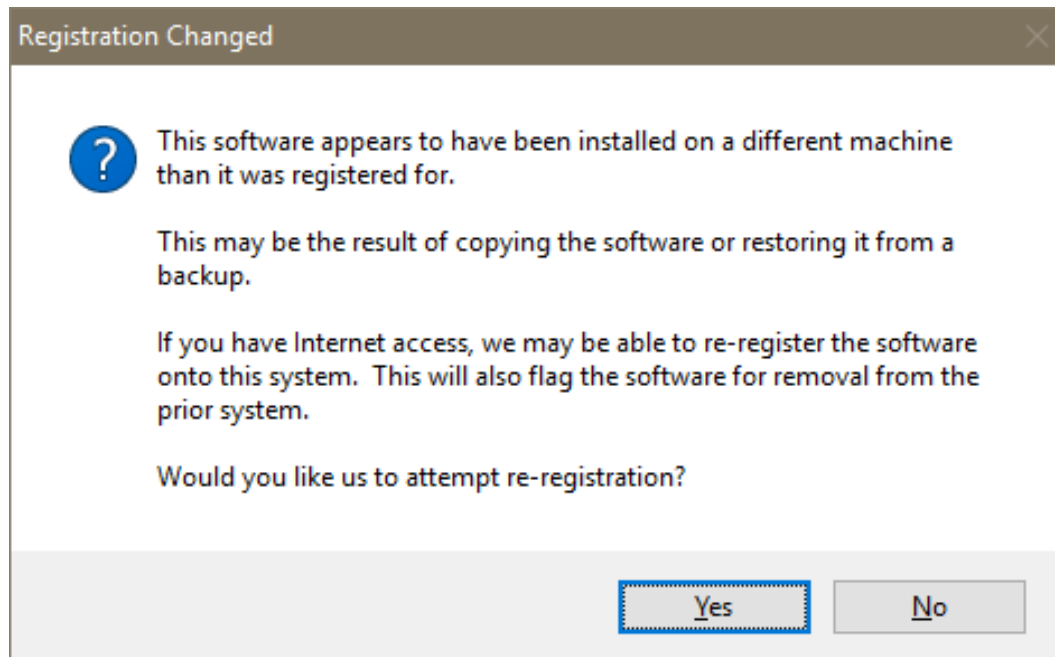

# Registration Enhancements

## Current logic

- Registration of PxPlus license
    - Activation key provided for initial install
    - Registration must be done within 30 days
    - Registration locks license to OS and disk
        - Cannot move PxPlus to new system
        - Contact PVX Plus Technologies to re-register

- During 2017 introduced a 'Move' process
    - Re-run online registration to decommission on current system
    - Run online registration to install on new system

# Registration Enhancements

## Emergency Transfer

- Automatic detection of 'moved' systems
  - Allows for registration on new server
    - Minimizes effort required to re-register

**Registration Changed** ✕

? This software appears to have been installed on a different machine than it was registered for.

This may be the result of copying the software or restoring it from a backup.

If you have Internet access, we may be able to re-register the software onto this system. This will also flag the software for removal from the prior system.

Would you like us to attempt re-registration?

[ Yes ]   [ No ]

# Registration Enhancements

## Improved Connectivity

- Firewalls can prevent online registration

  - Registration helps us and our resellers track use of software and applications

  - Provides valuable input for our support staff
    - What version is running
    - What OS and Packages

- Running **\*plus/reg/net** registers product

  - PxPlus 2016 added ability to route request through WindX
    - Uses WindX Internet connection to register

  - PxPlus 2018 adds support for Windows proxy
    - Uses **wininet** DLL to make connection

2018

# License Management

- ## Addressed problem with multiple installs
  - ### User counts could go against wrong license
    - Logic done with internal Windows objects

  - ### Revised user count allocation scheme
    - Tied properly to the ACTIVATE.PVX file
    - Similar to methods used on Linux/Unix
    - Not Compatible with prior releases

> User licenses are <u>not</u> shared between PxPlus 2017 and prior releases.  Single workstation running multiple pre-2017 versions will count as two users.
