# XML Enhancements

| Method                            | Description                                                                                  |
|-----------------------------------|----------------------------------------------------------------------------------------------|
| <b>Load_json(<i>jsonObj</i>)</b>  | Loads the data of a JSON object into the XML object.                                         |
| <b>Load_xml_file(<i>path</i>)</b> | Loads the XML object from the data in the given XML file. File contents must start with "<". |
| <b>Save_xml_file(<i>path</i>)</b> | Saves the XML object data to a file.                                                         |
